TOWN OF PARADISE ONSITE WASTEWATER MANAGEMENT ZONE

MANUAL FOR THE ONSITE TREATMENT OF WASTEWATER

REVISED OCTOBER 6, 2011
REVISED: NOVEMBER 8, 2005
REVISED: SEPTEMBER 9, 2004
REVISED: AUGUST 9, 2002
REVISED: MARCH 28, 2000
REVISED: JANUARY 1, 2000
ADOPTED: SEPTEMBER 14, 1995

List of Figures
List of Tables
Introduction i

PART A: PERMITS AND POLICIES

Chapter 1: Permits

1.1 General Guide for Onsite Sewage Disposal System Applications 1-1
1.2 Site Evaluation Report 1-2
1.3 Construction Permit 1-7
1.4 Operating Permit 1-8
1.5 Use or Modification of an Existing System 1-10
1.6 Repair of Failing Systems 1-11
1.7 Emergency Repairs 1-11
1.8 Licensing to Construct Onsite Systems and Provide Sewage Disposal Services 1-11

Chapter 2: Variances

2.1 Variance Application and Processing 2-1
2.2 Qualifications of the Variance Committee 2-2
2.3 Limitations on Variances 2-2
2.4 Duties of Variance Committee 2-3

PART B: DESCRIPTIONS AND DESIGN CRITERIA

Chapter 3: Selection of Appropriate Onsite Systems for Single Family Dwellings

3.1 General Requirements for Onsite Wastewater Disposal Systems 3-1
3.2 Selection of an Appropriate Onsite System 3-5
3.3 Lots with Limited Space for Waste Disposal System 3-6

Chapter 4: Description of Onsite Systems

4.1 Standard System 4-1
4.2 Pretreatment Systems 4-16
4.3 Pressure Distribution 4-27
4.4 Narrow Absorption Trenches 4-33
4.5 Deep Absorption Trench System 4-36
4.6 Redundant Systems 4-36
4.7 Steep Slope Systems 4-40
4.8 Capping Fill 4-41
4.9 Perimeter Drain or Tile Dewatering System 4-45

TABLE OF CONTENTS

4.10 Curtain Drain 4-48
4.11 Engineered Fill 4-51
4.12 Portable Toilets 4-53
4.13 Holding Tanks 4-54
4.14 Water Conservation Fixtures 4-56
4.15 Package or Plant Systems 4-56
4.16 Graywater Disposal System 4-56

Chapter 5: Component and Equipment Specifications

5.1 Septic Tanks 5-1
5.2 Dosing Septic Tank Assemblies 5-5
5.3 Distribution Boxes 5-6
5.4 Drop Boxes 5-6
5.5 Filter Fabric 5-7
5.6 Diversion Valves 5-7
5.7 Effluent Pumps, Controls and Alarms 5-8
5.8 Dosing Siphons 5-8
5.9 Pipe Materials and Construction 5-8
5.10 Flexible Membrane Liners 5-9
5.11 Portable Toilets 5-13

Chapter 6: Large Systems

6.1 Definition of Large Systems 6-1
6.2 General Requirements for Large Systems 6-2

Chapter 7: Innovative Applications 7-1

Chapter 8: Definitions 8-1

Appendices

Appendix A: Soil Profile Terminology A-1
Appendix B: Groundwater Monitoring Guidelines B-1
Appendix C: Hydraulic Testing of Soil C-1
Appendix D: Surface and Groundwater Monitoring Program D-1

History

Manual for the Onsite Treatment of Wastewater History

List of Figures

Figure No.	Title
1.1	Idealized Cross Section of an Escarpment With a Layer That Limits Effective Soil Depth
1.2	Idealized Cross Section of an Escarpment Without a Layer That Limits Effective Soil Depth
3.1	Soil Group Chart
3.2	System Selection Chart: Soil Group A
3.3	System Selection Chart: Soil Group B
3.4	System Selection Chart: Soil Group C
3.5	System Selection Chart: Soil Group D
3.6	System Selection Chart: Soil Group E
3.7	System Selection Chart: Soil Group F
4.1	Minimum Separation Distances Between Absorption Trench Bottom and Sensitive Layers
4.2	Typical Septic Tank Cross-Section
4.3	Typical Equal Distribution System With a Distribution Box
4.4	Typical Distribution Box Section
4.5	Typical Serial Distribution System With Drop Boxes
4.6	Gravity-Fed Absorption Trench Cross-Section
4.7	Typical Contained Intermittent Dosing Sand Filter
4.8	Bottomless Intermittent Dosing Sand Filter
4.9	Typical Recirculating Gravel Filter
4.10	Typical Cross-Section of a Recirculating/Mixing Tank
4.11	Typical Cross-Section of a Dosing Septic Tank
4.12	Pressure Dosed Absorption Trench Cross-Section
4.13	Narrow Absorption Trench - Narrow Spacing System
4.14	Deep Absorption Trench
4.15	Redundant Absorption Trench System
4.16	Capping Fill
4.17	Typical Perimeter or Tile Dewatering Drain

List of Figures

Figure No.	Title
4.18	Typical Curtain Drain
A.1	U.S. Department of Agriculture Textural Classification Chart
B.1	Piezometer for Measuring Shallow Groundwater in Soils Without a Restrictive Horizon in Top 3 Feet.
B.2	Piezometer for Water Tables Above Shallow Restrictive Layers
C.1	Typical Cross-Section of a Gravel Lined Percolation Test
C.2	Infiltration Ring Installed at Soil Surface
C.3	Absorption Test

List of Tables

Table No.	Title
3.1	Required Setbacks
3.2	Required Setbacks for Portable Toilets
3.3	Procedure for the Selection of an Appropriate Onsite Disposal System
3.4	Summary of Soil Types Found in Paradise and the Recommended Type of Onsite Wastewater Disposal System
4.1	Required Lineal Feet of Absorption Trench That Has 12 in. of DrainRock Receiving Effluent By Trickle Flow
4.2	Absorption Trench Specifications
4.3	Absorption Field Sizing for Trenches with 12 in. of Drainrock Over Permeable Soils Receiving Pretreated Effluent by Trickle or Pressure Dosed Flow
5.1	Properties of Unsupported PVC Used as a Membrane Liner in Filters
6.1	Design Flows for Commercial Establishments
B-1	Ten Year Rainfall for Butte County Intensity in Inches per Hour
