To the best of my knowledge, the work to be performed as authorized pursuant to the permit(s) for this project will not disturb **160 square feet* or more** of surface area of asbestos containing material. I understand that Section 7058.5 of the California Business and Professions Code requires that the removal of 160 square feet or more of surface area of asbestos containing materials must be done by parties properly licensed and certified to perform asbestos related work.
