Do I Need a Permit for My Home Project

Do I Need a Permit for My Home Project? Requirements vary, but many home-improvement projects, including electrical, mechanical, structural or plumbing work do require a permit. As a result of getting a permit, an inspector will check the work. Inspections provide a measure of safety to protect your life and property.

Projects That Usually Require Permits:

- Re-roofing
- Installing electrical outlets
- Replacing windows
- Remodeling kitchens or bathrooms
- Installing a pool, spa or hot tub
- Building an addition, including seasonal rooms
- Installing appliances and replacements such as furnaces, boilers, water heaters, fireplaces (wood and gas) and space heaters

If you are planning to make home improvements, check with Town of Paradise Development Services department before beginning your home-improvement project to find out what building safety code provisions apply and if you need a permit.
