Basic Disaster Supplies Kit Checklist

Disasters happen anytime anywhere. When disaster does strike you may not have much time to respond so it is important to prepare prior to an event. Be aware of the hazards in your community and how to react if things go bad. A highway spill of hazardous material could mean instant evacuation or shelter in place. A winter storm could confine your family at home. An earthquake, flood, wildfire could cut off basic services—gas, water, electricity and telephone—for days or even weeks.

Water

- 3 to 7 day supply (one gallon a day per person). Additionally, in determining adequate quantities, take the following into account:
  - Individual needs vary, depending on age, physical condition, activity, diet, and climate.
  - Children, nursing mothers, and ill people need more water.
  - Very hot temperatures can double the amount of water needed.
  - A medical emergency might require additional water.

Food

Store at least a three-day supply of non-perishable food. Select foods that require no refrigeration, preparation or cooking and little or no water. If you must heat food pack a can of sterno or other heating systems. Select foods that are compact and lightweight. Be sure to inspect and rotate supplies regularly.

- Ready-to-eat canned meats, fruits and vegetables (don’t forget a non-electric can opener)
- Canned juices, milk, soup (if powdered, store extra water)
- Staples—Sugar, salt, pepper
- High energy foods—peanut butter, jelly, crackers, granola bars, trail mix
- Vitamins
- Foods for infants, elderly persons or persons on special diets
- Comfort/stress foods—cookies, hard candy, sweetened cereals, lollipops, instant coffee, tea bags

Clothing and Bedding

- Sturdy shoes or work boots
- Rain gear
- Blankets or sleeping bags
- Hat, gloves and sunglasses
- Thermal underwear
