Pacific Gas & Electric has notified the Town of Paradise of a planned power outage which will affect operation of two traffic signals along Skyway. Starting at 8:00 PM on Friday, September 19, the traffic signals of Skyway at Maxwell Drive and Skyway at Bille Road will be without power. This power outage will continue through 8:00 PM on Saturday, September 20. Public Works crews will install temporary "STOP" signs and turn the signals to four-way red-flash in advance of the outage. When work is complete, the temporary signs will be removed and normal signal operation will resume.

Motorists are cautioned as the outage will cause minor delays through the intersections. Per California State law, any instance where a signal is without power, drivers are required to treat the intersection as an all-direction stop.
