***Downtown Paradise Signals to Improve September 30***

September 18, 2014

For further information, contact Marc Mattox at  
(530) 872-6291 x125, Monday-Thursday, 8am to 5pm

Construction for the Downtown Paradise Safety Project is coming to a close. Although concrete-work, paving and striping are complete, signal improvements at Skyway/Pearson and Skyway/Elliott have been ongoing. On September 30, crews will be on-site to install new controllers equipped with GPS at these intersections. This means signals will be coordinated to provide synchronized green lights during peak commute times. While signal operation will substantially improve immediately, minor adjustments are expected over the following weeks.

More information on the project can be found on the Town's website at [www.townofparadise.com](http://www.townofparadise.com).
