On Tuesday, May 13, 2014 crews from Intermountain Slurry Seal will be performing several micro-surfacing repairs in the Town of Paradise. The repairs will be made along Skyway, just south of the Neal Road signalized intersection and at Pearson Road near Hilbe Drive.

On Skyway, the outside northbound lane will be closed early Tuesday morning to facilitate the repairs. The lane closure is expected to be removed in the late afternoon and should not present any delays in traffic through the project area.

The Pearson Road repairs will require temporary traffic control for an hour during Tuesday morning. Motorists can expect flaggers facilitating one-way reversible flow traffic. Delays through the Pearson Road project area should be minimal and motorists do not need to seek alternate routes.

The repairs are being made under warranty for the 2013 Paradise Micro-Surfacing Project.
