

PARADISE IRRIGATION DISTRICT

6332 Clark Road, Paradise CA 95969 | Phone (530)877-4971 | Fax (530)876-0483

WATER SERVICE REQUIREMENTS

Planning ahead for water service to your new home or business is an important process. The existence of a buildable lot does not imply that water service is readily available to the lot, even if neighboring properties are being served water.

If you are within our service area, Paradise Irrigation District will review what is necessary to provide water to your property, including what is involved in establishing a connection to the District system. There is no charge for this review.

If needed, a Water Service Requirements letter will summarize what is necessary to provide a service connection to your property. If substantial effort and expense is involved in completing your water connection, you will be forewarned and able to make an informed decision on how to proceed.

To initiate the review process, contact customer service at 530-877-4971, pidwater.com or come into the PID office at 6332 Clark Rd, Paradise CA 95969. Please have a copy of the plan check or building permit receipt with the associated building permit number.
